

Lakeville Village Planning Study

Public Engagement Questions

The planning professionals at Colliers Engineering & Design (CED) are working with the Town of Salisbury's Planning and Zoning Commission to evaluate the existing conditions in Lakeville village. The [study area](#) is located between the Grove and Salmon Kill Road, and between Rte. 44 and the Rail Trail.

A vital step in the planning process is gathering public input. **We welcome your responses to any and all of the questions below.** Please circle your answers or write in your responses on the following form, then, scan and return to Debbie Lawlor at debbie.lawlor@collierseng.com. Alternatively, you may provide written responses via email. **Please submit responses no later than April 1, 2023.**

Based on your responses CED will develop recommendations for enhancements and mitigations targeted at the five study parameters outlined as follows.

1. Pedestrian and bicycle access, circulation, and safety

Is the [study area](#) pedestrian and bicycle friendly? **Y / N**

Do you or members of your family bicycle directly on Rt 41 or Rt 44? **Y / N**

When visiting The Grove, do you walk or bike to local eateries or shops?

Walk Bike

Do you walk or bike between Lakeville and Salisbury village centers?

Walk Bike

When traveling on foot or by bicycle do you use the crosswalks on Rte. 41?

Always / Never / Sometimes

When traveling on foot or by bicycle do you use the crosswalks on Rte. 44?

Always / Never / Sometimes

Are additional crosswalks needed?

Y / N

If yes, where?

Are additional bicycle racks needed?

Y / N

If yes, where?

Identify locations where improvements need to be made to correct unsafe or limited access and circulation for people of all abilities (lack of depressed curbs, uneven pavement, discontinuous sidewalks, lack of bicycle lanes, unpaved parking lots, absence of striping and signage, lack of designated handicapped parking spaces).

2. Accessibility and utility of public open space and greenspace

There are several green spaces within and adjacent to the Lakeville village center including Community Field, open space on either side of the Rte. 41 and Rte. 44 intersection, and the landscaped end of Factory Pond bordering Holley Street.

Are existing open spaces attractive and adequately landscaped? **Y / N**

What additional open space upgrades or amenities are needed in the study [area](#)?

Identify locations in the Lakeville village center where additional street furnishings would be useful (including benches, trash receptacles, planters, picnic tables).

How do you access Community Field? (Circle all that apply)

Foot / Bicycle / Motor Vehicle

If you drive to Community Field, do you have difficulty finding parking? **Y / N**

How do you access the Grove? (Circle all that apply)

Foot / Bicycle / Motor Vehicle

If you drive to the Grove, do you have difficulty finding parking? **Y / N**

3. Traffic and vehicular circulation

Are there any particular locations/intersections in the [study area](#) that you would identify as unsafe?

Are there any locations/intersections where you experience delays while driving on a day-to-day basis and/or during summer? **Y / N**

If yes, where?

How would you describe the speed of vehicles, including trucks, travelling through the Lakeville village center area along Rte. 41 and Rte. 44?

Under Posted Speed Limit

At Speed Limit

Exceeds Speed Limit

I Do Not Know the Posted Speed Limit

Do you find vehicle traffic circulation patterns around the Old CNE Railroad station and to/from The Grove to be clearly demarcated? **Y / N**

Is it obvious which roadways have the right-of-way? **Y / N**

Are there other intersections or areas that would benefit from wayfinding or directional signage?

Y / N

If yes, where?

4. Parking

Do you feel that there is sufficient parking in the [study area](#)? **Y / N**

When going to several stores/services/restaurants in Lakeville in a single trip, do you **park once and walk** or **move your car from place to place**?

Are the parking lots in the [study area](#) center easy to access and circulate within? **Y / N**

In the area of the Old CNE Railroad train station, where do you park if that parking area is full?

5. Storm water management

Are you aware of storm water problems in the [study area](#), as evidenced by inundation (ponding/flooding) and/or flood-borne debris? **Y / N**

Where?

6. Additional comments

We value your local and historic knowledge greatly, and appreciate you taking the time to review and respond to the questions above. Feel free to provide additional comments related to any of the five parameters of the study.

Also, comments concerning connectivity, or lack-thereof between Lakeville and Salisbury village centers would be helpful.
